PROFESSIONAL SUMMARY

Computer Science graduate (B.Tech CSE, AI & ML, 2026, CGPA 8.0) seeking a Graduate Trainee role in software development or AI/ML. Strong fundamentals in Python, object-oriented programming, SQL, and data structures and algorithms, with hands-on knowledge of NumPy, Pandas, Matplotlib, Seaborn, and Scikit-learn for data analysis and machine learning. Built REST API backends with FastAPI and Django, integrated LLM APIs (Google Gemini) with RAG in an AI Virtual Teacher project, and completed a Python internship project using MySQL. Quick learner, eager to contribute to real-world software and AI projects and grow within a structured training program.

TECHNICAL SKILLS

- **Programming Languages:** Python, JavaScript (ES6+), SQL
- **Backend and APIs:** Django, FastAPI, REST APIs, Twilio Voice API
- **Databases:** MySQL, PostgreSQL
- **AI and ML:** LLM Integration, Google Gemini API, Retrieval-Augmented Generation (RAG), Sentence Transformers (Embeddings), Deep Learning, Recurrent Neural Networks (RNN), Supervised Learning, Unsupervised Learning
- **Data Libraries:** NumPy, Pandas, Matplotlib, Seaborn, Scikit-learn
- **Frontend:** HTML5, CSS3, Bootstrap 5, Streamlit
- **Core CS:** Data Structures and Algorithms (Arrays, Strings, Sorting, Binary Search, Two Pointers, Sliding Window), Time and Space Complexity Analysis, Object-Oriented Programming
- **Tools:** Git, GitHub, VS Code, Google Colab

EDUCATION

Bachelor of Technology (B.Tech), Computer Science and Engineering (AI and ML)
Malla Reddy Institute of Technology and Science, Hyderabad | 2022 - 2026 | CGPA: 8.0

INTERNSHIP EXPERIENCE

Python Bootcamp Intern | Pantech Prolabs India Pvt Ltd | Certificate issued August 2025

- Built a banking application using core Python and object-oriented programming (OOP) concepts.
- Integrated a MySQL database to store and manage application data.
- Completed the bootcamp and received an internship certificate (issued 14 August 2025).

PROJECTS

AI Virtual Teacher | Python, FastAPI, Gemini API, RAG, RNN, PostgreSQL

- Built a virtual teacher that answers student questions using retrieval-augmented generation (RAG) to ground responses in retrieved content.
- Integrated the Google Gemini API for natural language understanding and response generation.
- Implemented Sentence Transformers embeddings to retrieve relevant content for each question.
- Integrated a text-to-speech (TTS) API to deliver spoken responses for voice-based learning.
- Designed a FastAPI backend with PostgreSQL to manage the full session from student input to AI response.

AI-Powered Sales Executive System | Python, Twilio Voice API, Google Gemini AI, REST APIs

- Built an automated voice-call system that holds AI-driven conversations and adapts to customer input in real time.
- Integrated Google Gemini AI for language understanding and real-time decision making.
- Implemented Twilio Voice API for end-to-end appointment booking.
- Designed a REST-based backend pipeline covering the full sales call lifecycle, from initiation to confirmed booking.

Responsive Trip Booking Website | HTML5, CSS3, Bootstrap 5, JavaScript

- Built a responsive flight and tour booking application for desktop, tablet, and mobile using the Bootstrap 5 grid.
- Developed real-time search, multi-step booking forms, and interactive listings using JavaScript and DOM manipulation.
- Improved page load time by approximately 35% through efficient grid usage, fewer DOM re-renders, and structured CSS.
- Ensured cross-browser compatibility on Chrome, Firefox, and Edge.

SOFT SKILLS

Problem-Solving, Effective Communication, Time Management, Adaptability, Teamwork, Quick Learner

LANGUAGES

English, Hindi, Telugu
